

colour scheme

start menu

i would LOVE to have some sort of moving / animated element on the start page. gotta impress them right away ... , and it is currently missing tetris cat ... hmm

waduodi

Login button where start it? Changes to start after ur logged in and then a signout button in like the top right or smth?

Shak

hit start: login prompt? or straight to game select?

Signup should be more or less the same

Shak

is login mandatory or can you play as a guest ?
hmm
also i stole this from shakil i have no shame
#teamwork

waduodi

Lemme cook ↗
Pretty easy to add to all screens basically makes it look wavy better

Shak

optional tetriscat (not optional)

waduodi

chess

point advantage should be added and timers for both players

Shak

should maybe have a back button and when you press that it gives you options to: resign, request a draw, or cancel

waduodi

can be added for all games

Shak

profile photos, usernames i don't know how chess works

waduodi

some sort of subtle pixelly environment in background for visual interest

Level Selection

stars for consistency with start page. i really liked emily's game cartridge idea for the game select, and it'll also work well if we end up theming each of the games after their own retro video game !!

waduodi

for header font: that pixelly font we've been using ?

can be used everywhere.
<https://www.fontspace.com/>
lets you type a text and save it as an image

Shak

checkers

Pieces lost

waduodi

if we implement skins, i think we only need colors for checkers

also king/queen piece needs to work

Shak

click how checkers works

waduodi

time elapsed?
if we have that ↗
idk if either game needs a timer

Shak

connect 4

why is the cat playing connect 4?? who did that???? o'

Shak

i think tetris cat should only put it in when the opponent does it, not you. would be sick

Shak

tic-tac-toe

for this one specifically, i think it'd be really cute to use scratchy pencil-y handwritten fonts and elements to go with the ripped paper theme!!

waduodi

thumb up

LEADERBOARD

maybe we should make it so you can scroll to see past 5. like 1,2,3 are the podium and 4 and 5 are still on the screen but below and then you need to scroll to see 5-10 or wherever it ends

Shak

also maybe gold silver and bronze colors for podium?

Shak

list continues
